

Puppy Escape

Narrative Recall Scoring Rubric (PE-18)

Overview

The Puppy Escape is a narrative recall task: the participant is read and shown a short story and asked to retell it from memory immediately, and then again after a 15-20 minute delay. This PE-18 rubric is a streamlined subset of 18 items (each scored 0 or 1). Each row in the scoring table below captures one detail or concept that may appear in the participant's recall. During recall, enter 1 in the Scored column for each item the participant covers, or 0 if not, then sum the column for the total (max 18) after recall.

Administration Instructions

- Instruct participant that they will be read and shown a short story, and that they should remember details.
"I will now read you a short story. Please read along with the story, and remember as many details as you can. I will ask you later about how much you remember."
- Place full-page narrative in front of participant. Read the narrative out loud, slowly and clearly, as the participant follows along.

NOTE: It is *not required* for participant to visually follow along. *Do not stop.*

Last weekend, Harry and Danielle were walking their dog Maddy through the park. They ran into some old friends that they hadn't seen in years. They struck up a long conversation about their lives, and decided to all go out to dinner on Thursday at Luigi's. However, it wasn't until after they said goodbye to their friends that they noticed that Maddy had gotten out of her leash! The couple searched throughout the whole park, calling out her name and getting more worried the longer they searched. He checked the nearby school and playground, and she investigated the baseball and soccer fields. Eventually, they found her: she was playing with a stick she found underneath a bench near where they stopped to talk with their friends.

- Immediately after finishing the story, **remove the full-page narrative** and then ask participant to recall as many details as they can about the story.
"Now tell me as much of the story as you can remember. Please be as detailed as you can."
- After a delay of 15-20 minutes (filled with surveys, additional assessments, or exams), ask participant to recall the story about the dog and describe everything they remember:
 - *"Remember the story you heard earlier about the dog. Please describe everything you remember about the story, being as detailed as you can."*

Scoring Instructions

- Items in ***bold italics*** require the word/phrase shown (or one of the listed alternates after *Accepted*:).
- All other items credit paraphrases and synonyms — score on the participant's *intent*, not their phrasing.
- Fill the Scored column with 1 if the participant covered the item, or 0 if not. Sum the column for the total.
- Score 0 only when the concept is clearly absent or contradicted.

Participant: _____

Date: _____

Immediate Recall

Q#	Question	Scored
1	Did the participant correctly identify the name Harry ? <i>Accepted: Harry, Harold, Henry</i>	
2	Did the participant correctly identify the name Danielle ? <i>Accepted: Danielle, Dani, Danny</i>	
3	Did the participant correctly recall that the pet's name is Maddy ? <i>Accepted: Maddy, Madison, Mary</i>	
4	Did the participant describe any action between the characters and another person or group?	
5	Did the participant identify any plans made during the conversation?	
6	Did the participant correctly recall that the friends decided to all go out to dinner ?	
7	Did the participant identify when any plans were to take place?	
8	Did the participant correctly recall that the date for the dinner was on Thursday ?	
9	Did the participant describe a general location for where the characters planned to have a meal?	
10	Did the participant correctly recall that the setting for the dinner was at Luigi's ?	
11	Did the participant state a time when the characters noticed the animal got out of her leash (e.g., while talking, after saying goodbye, in the afternoon)?	
12	Did the participant indicate a location for where the characters were searching?	
13	Did the participant correctly identify that one of the locations searched was the school ?	
14	Did the participant correctly identify that one of the locations searched was the playground ?	
15	Did the participant correctly identify that one of the locations searched was the baseball field ? <i>Accepted: baseball field, ball field</i>	
16	Did the participant correctly identify that one of the locations searched was the soccer field ? <i>Accepted: soccer field, football field</i>	
17	Did the participant correctly recall that the dog was playing with a stick ?	
18	Did the participant correctly recall that the dog was found under a bench ?	
	Total	

Participant: _____

Date: _____

Delayed Recall (____ minutes)

Q#	Question	Scored
